

UNITY RISING PROJECT

Unity Internet Operating System / UIOS

Global software social support system - Co-Create New Paradigms for the World

-Introduction-

What we create and how we share it inspires confidence and enthusiasm to change the world. The Unity IOS is a new form of organization for software. A unified open-source web and software development platform that weaves together the major functions and features of current communications digital software and hardware technologies we have creating a new architecture of software and social intent for global unity.

The focus of Unity IOS is to create an open-source unified environment with tool sets and support channels for empowering individuals to co-create their ideas, projects and dreams together. To support and empower individuals all over the world to connect, organize and unify co-creatively in new social paradigms for the world integrating current social organizational structures we have regionally and globally.

We, as a global community have infinite resources and ways to co-create as we choose. In local regions and area all over the world, we have the same abundance in our capacity to co-create. Learning to move beyond self-sustaining and become overflowing in creative abundance. Formed in the intent to create specific and focused tools to assist communities to organize in harmony through their diversity creating more abundance and stability locally and globally. Connecting the people and all the resources and tools to co-create openly in an organized communal atmosphere.

-Template of Intent-

1

- ✦ **T**o create a portal for a global co-creative unified environment of infinite channel of tools, support and abundance in creating our ideas, projects, dreams.
- ✦ **C**reating a relationship between digital technologies and beneficial social and ecological intent.
- ✦ **A** platform of tools to allow people to practice living in a new paradigm of co-existing and co-creating.
- ✦ **N**ext generation web platform making use of current software and technological capacities in all new ways.

- ✦ **D**isplaying geospatial based visual map showing a rich detailed and diverse community and environmental resources.
- ✦ **C**reating specifically developed toolsets for different regions across the world that are sharable between regions.
- ✦ **F**ully self-sustainable financial and resource support.
- ✦ **A** social media based communication platform focused specifically on uniting communities and regions through clear intent.

- Overview -

2

Unity Rising is a social network architecture designed to support the world collectively in a new organized framework of intent to creative anything we choose for earth. Connecting individuals in local communities, cities and regions globally. By focusing on one area and scale at a time in developing, we can give a lot of attention in detail at different levels of scale of interaction within and between communities. The main sections of the website are described below.

Sovereign Freedom

Reality will utilize current and industry proven game design techniques and game engines, yet take them to new dynamic heights of innovation through development. Reality will have highly realistic and interactive environments mirroring that of our own. The only limits to the player's creative and dynamic abilities in the game will be their imaginations.

Co-Creating Unity

Reality will utilize current and industry proven game design techniques and game engines, yet take them to new dynamic heights of innovation through development. Reality will have highly realistic and interactive environments mirroring that of our own. The only limits to the player's creative and dynamic abilities in the game will be their imaginations.

Networking Abundance

Reality will utilize current and industry proven game design techniques and game engines, yet take them to new dynamic heights of innovation through development. Reality will have highly realistic and interactive environments mirroring that of our own. The only limits to the player's creative and dynamic abilities in the game will be their imaginations.

Digital Tool sets

By utilizing a state of the art cutting edge game engine, Reality will strive to produce both brilliant visuals and frame rate stability on console systems and both current computer and future computer hardware technology.

Financial Funding

Reality will use the latest and most dynamic physics engine available to create realistic movements, actions and effects for the many objects and players in the game.

Human resources

The Reality game experience will be massively multiplayer online based and is sure to be one of the most, complex, refined and deep gaming experiences to have ever appeared on the gaming scene. The combination of the MMORPG and RTS gaming experience will be a surefire hit in the gaming community, bringing game fans from both genres together for the first time on an unprecedented scale.

Physical resources

Reality is a mirrored image of our story, of our present age and of our future age to come.

-Development Stages-

3

The first phase of development will focus on creating a template for the island of Kauai and next to all of the islands of Hawaii.

- ✦ **First** Development Stage (Island of Kauai)
- ✦ **Second** Development Stage (Islands of Hawaii)
- ✦ **Third** Development Stage (United States)

- ✦ **Fourth** Development Stage (Europe, South America, Africa, India, and Asia)
- ✦ **Fifth** Development Stage (Focused on full launch with world wide support

-Features Overview-

4

The two main aspects are the community and the environment. The community comprises everything going on with way of life, focuses on different aspects of the community so people can share and connect about ideas and ways of life harmonizing the community and creating a greater level of abundance and joy for the community.

-Dynamic Information Threads-

5

Creating an open transparent community based and operated news feed for local information and news focused on two aspects of the regional area is one of the primary focuses of the website. The two main aspects are the community and the environment. The community comprises everything going on with way of life, focuses on different aspects of the community so people can share and connect about ideas and ways of life harmonizing the community and creating a greater level of abundance and joy for the community.

- ✦ **Local Community News** (Edited by passionate local community members)
 - ✦ **Local Environment News** (Edited by passionate local community members)
-

-Community Co-Creation Organization-

6

The community co-creation tools are specifically designed to cater to supporting diverse communities all over the world. The tools will be a developed mix of various ways to connect and co-create based on the regional cultural ways of life. These various toolsets developed uniquely for different cultures are shareable between cultures to offer more diversity.

- ✦ **Local Causes** (Restore Land, Community Gardens, Beach Clean-Up, etc.)
- ✦ **Local Events** (Kirtan, Potlucks, Yoga, Barbecue, Festivals, etc.)
- ✦ **Local Creative Circles** (Arts, Crafts, Dance, Music, Food, etc.)
- ✦ **Local Services & Creations** (Listing of community members services and creations)

-Shared Stories & Templates-

7

As communities dream up new ways to live and co-create in the website these connections and stories playing out are shared with others globally via the news feed and custom filters and data query methods. Each overview of a story of how a group of individuals created something amazing for their community somewhere in the world and how it all played out. This allows and supports people to learn from each other globally and their ideas to live differently and in harmony with their regional environment. When we share these ideas and epic stories of change, it inspires us all, gives us hope and confidence in our ability as individuals to rise up in the power of unity.

- ✦ **Land Resources** (Display and listing of land open for use for community co-creation)
- ✦ **People Resources** (Display and listing of local community members skills and interests)

-Geospatial Resource Mapping-

8

The regional resources maps are a vital tool to the way to visual connect and view information about regional areas all over the world in a whole new way. Combining detailed information about the local region gathered and input into the website by the local community members.

Varying Dimensional lenses, filtering multiple data points, dimensions of via a lenses like a microscope peering through layers of multidimensional data, real time geospatial fractals.

- ✦ **Land Resources** (Display and listing of land open for use for community co-creation)
- ✦ **People Resources** (Display and listing of local community members skills and interests)

-Multidimensional Visual Data Environment-

9

Innovative visual data design tools, creating and shaping digital data in fields of resonance in a multidimensional geometric plane environment.

- ✦ **Land Resources** (Display and listing of land open for use for community co-creation)
- ✦ **People Resources** (Display and listing of local community members skills and interests)

-Information Filtering and Tracking-

The regional resources maps are a vital tool to the way to visual connect and view information about regional areas all over the world in a whole new way. Combining detailed information about the local region gathered and input into the website by the local community members

- ✦ **Land Resources** (Display and listing of land open for use for community co-creation)
- ✦ **People Resources** (Display and listing of local community members skills and interests)

-Community Development Pipelines-

The website will be initially designed for and open sourced to the community, support co-creative development pipelines for the community and crowdfunded by the community. The framework and initial tool sets to be developed would be designed to evolve to where everyone collectively becomes the support base to develop it and use it, no longer a concentrated organizational structure, becoming diffuse in organization and development structure.

-Self-Sustaining and Evolving Design-

The platform is designed to sustain itself in new ways in the market of free services large scale websites. Utilizing crowdfunding ads relating to member preferences and local community advertising for services and goods. Both of these methods assist in shifting world paradigms.
